

Cherry Tree Class -Spring Term

Mathematics

At Woodfield we follow the White Rose Mathematics scheme. In the Spring Term, pupils will continue their learning and practice of multiplication and division. They will also begin to explore fractions.

English

Pupils will continue their progress in phonics with Bug Club.

They will work on further developing their comprehension and inference skills and in spellings, they begin to learn common exception words and the first 200 most common words.

They will look at and practise sentence construction in their own compositions and writing. Pupils will also explore their first short novel with the Pet Sitter series.

Design, Technology and Art

Pupils will engage in cooking sessions at least 4 times this term. They will prepare ingredients hygienically using the appropriate utensils by following a recipe.

In Art, pupils will make informed choices in drawing inc. paper and media. They will alter and refine drawings and describe changes using art vocabulary.

Pupils will collect images and information independently in a sketchbook and use research to inspire drawings from memory and imagination.

PSHE

We continue to follow the Jigsaw PSHE programme. This term, pupils will learn about looking after their bodies and keeping themselves fit and healthy. We will also explore what pupils know about drugs and being able to identify safe and unsafe actions.

Humanities

In History, pupils will explore ancient Greece and its historical development and key features.

In Geography, pupils will look at how to use a compass. They will also explore the extremes of Earth.

PE/Dance

This term, pupils will continue with their swimming, and in PE lessons, they will learn about yoga and circuit training. Pupils will develop their strength and agility, as well as determination and resilience. They will understand how to exercise safely and be able to describe how their bodies feel during activities.

Digital Skills

Pupils will be introduced to basic algorithms and will program a floor robot to move in different directions and follow simple routes.

Creative Arts

Pupils will continue to enjoy creativity through Music, Dance and Drama lessons. They will learn more about pulse and be able to chant with a good sense of pulse and perform using graphic notation.

They will recognise and perform rhythmic patterns in songs and demonstrate awareness between pitch, shape and rhythm using graphic notations. They will listen to and make observations on a variety of live recorded music, especially music from films.

In Drama, they will continue to explore jobs through acting and look at character creation through the musical Oliver Twist and explore some puppet theatre.

Science

Pupils will look at balanced and unbalanced forces. Pupils will go to Brolay farm and investigate animal husbandry. They will groom an animal and observe and record animal behaviour.
